# What if your SAP apps could run 10X faster on any device?

Google Cloud and itopia help manufacturers speed up production and improve worker satisfaction with virtualized SAP accessible from any device.

Lift your Custom SAP Apps to the Cloud

- Enjoy lightning-fast performance of your existing SAP apps by running them on Google Cloud's high-speed network.

- Virtualizing your SAP apps allows you to ensure all employees have the same experience across all their devices, no matter where they're working from.

- Avoid the costly and lengthy process of re-building your SAP apps from scratch to work in the cloud. Virtualizing SAP ensures limitless cloud-native performance that can scale at a moment's notice.

Enjoy Simplified Management and Slash IT Costs

- Manage any number of departments and offices from itopia's centralized, wizard-based console.

- No more endpoint management. With itopia, you control all corporate data with PCI, SOC, and ISO compliance on GCP's secure network.

- Only pay for what you need. Shift from costly, CapEx-intensive on-prem VDI and harness the lightweight scalability of the cloud.

Success Story

TBInt.

✓ TB International GmbH was able to rapidly virtualize their SAP apps to run on any device across their vertically-integrated manufacturing & retail organization.

✓ Workers gained secure access to SAP while working from anywhere, while realizing the performance benefits of Google Cloud's modern network.
Unlock Tremendous Value with an OpEx Model and Automation

No more upfront CapEx for procuring servers, storage, networking, power, cooling, or refreshing of hardware.

itopia's app virtualization is a low-cost subscription-based price for enterprises. No runaway cloud fees.

Reduce the IT burden on staff by 65% with itopia's automated lifecycle management.

Google Cloud   itopia

Technical Differentiation

- ● Tier 1 sysadmins can easily deploy **custom SAP apps on Windows 10 and Windows Server virtualized environments** on Google Cloud's global, high-speed network.

- ● Collections pools enables easy segmentation of departments and offices with custom images of apps and permissions. **One-click onboarding of employees with centralized management** all from a single console in the browser.

- ● Intelligently autoscale compute resources up and down for optimal performance. **Automatically power VMs on and off to match real-time end-user demand.**

- ● **All apps are streamed securely through the browser --** and all sensitive patient data is stored securely within your GCP project with HIPAA-compliance. itopia's automation platform does not have access to your data.

Workers enjoy a one-click login to their SAP apps on any device
